

Jonathan H. Huggins

CONTACT INFORMATION	655 Huntington Avenue Building 2 Boston, MA 02115 USA	✉ jhuggins -at- mit -dot- edu 🌐 jhhuggins.org
RESEARCH INTERESTS	large-scale learning, inference algorithms for rich model classes (e.g., Bayesian nonparametric models, probabilistic program), interface between learning and inference.	
EDUCATION	Massachusetts Institute of Technology , Cambridge, MA USA Ph.D., Computer Science, June 2018 <ul style="list-style-type: none">• Dissertation topic: Scaling Bayesian Inference: Theoretical Foundations and Practical Methods• Advisor: Tamara Broderick S.M., Computer Science, June 2014 (GPA: 5.00) <ul style="list-style-type: none">• Advisor: Joshua B. Tenenbaum• Selected coursework: Advanced Algorithms, Probability Theory, Inference and Information Theory Columbia University, Columbia College , New York, NY USA B.A., Mathematics, May 2012 (GPA: 4.04) <ul style="list-style-type: none">• Research Advisors: Liam Paninski and Frank D. Wood• Selected coursework: Machine Learning, Computational Learning Theory, Probability Theory, Real Analysis, Graph Theory	
GRANTS, HONORS, AND AWARDS	ISBA@NIPS travel award (2016) DoD National Defense Science and Engineering Graduate Fellowship (2013-2015) NSF Graduate Research Fellowship (2013) (<i>declined for DoD NDSEG</i>) Hertz Fellowship Finalist (2013) Summa Cum Laude, Columbia University (2012) Phi Beta Kappa (2011) Rabi Scholar, Columbia College (2008-2012) Intel Science Talent Search Finalist (2008)	
ACADEMIC EXPERIENCE	Harvard University , Cambridge MA USA <i>Postdoctoral Research Fellow</i> March 2018 - present <i>Department of Biostatistics, T.H. Chan School of Public Health</i> Massachusetts Institute of Technology , Cambridge, MA USA <i>Graduate Student</i> September 2012 - February 2018 <i>Department of EECS and Computer Science and Artificial Intelligence Laboratory</i> <i>Teaching Assistant</i> September 2016 - May 2017 Held office hours, conducted recitation sessions, graded homework, and advised students on class projects for graduate-level machine learning courses (6.862 and 6.867). Microsoft Research New England , Cambridge, MA USA <i>Research Intern</i> June 2017 - August 2017 Research topic: Fast generalized maximum mean discrepancies (advisor: Lester Mackey).	

Columbia University, Columbia College, New York, NY USA

Undergraduate Researcher

June 2011 - May 2012

Conducted independent research in statistics for neuroscience (advisor: Liam Paninski) and Bayesian nonparametric modeling (advisor: Frank Wood).

Teaching Assistant

June 2011 - May 2012

Duties included office hours and grading of homework for introductory statistics and data structures courses.

PROFESSIONAL
SERVICE

Journal Reviewer:

- PLoS One

Conference Reviewer:

- Advances in Neural Information Processing Systems, 2011-present
- International Conference on Machine Learning, 2015-present
- Artificial Intelligence and Statistics, 2016-present

PROFESSIONAL
EXPERIENCE

Google Inc., New York, NY USA

Summer Engineering Intern

May 2012 - August, 2012

Developed, created, and deployed a language-model based “gibberish detector” for identifying short text sequences as nonsensical.

MITRE Corp., Bedford, MA USA

Technical Co-op

May 2007 - August 2009

Worked with multiple teams on natural language processing problems such as co-reference finding, action recognition in free text, and named entity recognition. Projects were implemented in OCaml, Python, and Perl and used techniques such as integer linear programming and conditional random fields.
